PROFESSIONAL SUMMARY

Systems Engineer with hands-on experience supporting enterprise-scale IT infrastructure across LATAM, Spain, and Portugal. Skilled in identity and access management, incident resolution, and operational stability of complex environments. Combines a strong foundation in systems operations (Active Directory, Okta, ServiceNow, VPN, Windows/Linux) with software engineering capabilities — enabling end-to-end ownership of both infrastructure and the tools built to support it. Currently pursuing a Systems Engineering degree with a focus on distributed systems and platform reliability.

PROFESSIONAL EXPERIENCE

Systems Support Engineer — Enterprise IT Operations — **Cognizant** Jan-2026 – Present

Supporting LATAM, Spain & Portugal enterprise environments

- ▶ Maintain operational stability of enterprise IT systems across a multi-region environment spanning LATAM, Spain, and Portugal, ensuring high-availability SLAs are consistently met.
- ▶ **Active Directory & Okta:** Administer identity and access management workflows using. Manage user lifecycle, group policies, SSO configurations, and access provisioning/de-provisioning across corporate systems.
- ▶ **ServiceNow:** Perform enterprise infrastructure troubleshooting and incident resolution within ITIL-aligned processes on. Triaging, escalating, and resolving hardware, software, and connectivity incidents across distributed endpoints.
- ▶ Support VPN infrastructure, remote access configurations, and endpoint management for geographically distributed workforces.
- ▶ Collaborate with cross-functional IT teams to deliver SAP environment support and enterprise application access management.

Systems & Full-Stack Developer — **Floricultura Tanaka (Freelance)** Nov-2024 | Jan-2025

Desktop business management system — React · Electron · Node.js · Supabase

- ▶ Designed and delivered a secure desktop management system with role-based authentication, administrative dashboard, and real-time data sync — demonstrating end-to-end system ownership from architecture to deployment.
- ▶ Implemented secure auth flows and data management using Supabase (PostgreSQL) and Redux state management.

Full-Stack Developer — **Funeraria Vida Plus (Freelance)** Jan-2025 | May-2025

Scalable institutional web platform — React · Node.js · TailwindCSS

- ▶ Built two web platforms for the same client across separate engagements — first a lightweight SPA focused on accessibility and usability, then a full redesign with modular architecture, optimized performance, and improved scalability.
 - ▶ Handled complete project lifecycle: requirements, architecture, development, and delivery without external dependencies.
-

TECHNICAL SKILLS

Systems & Infrastructure: Active Directory · Okta (IAM/SSO) · ServiceNow (ITIL) · VPN · SAP · Virtualization

Cloud Platforms: Microsoft Azure · Amazon Web Services (AWS)

Infrastructure as Code (IaC): Terraform · Ansible

Containers & Orchestration: Docker · Kubernetes

CI/CD & Code Quality: · Git · SonarQube · Jenkins

Operating Systems: Linux (Ubuntu/Debian) · Bash scripting · macOS · Windows Administration ·

Scripting & Command Line: CMD · Bash · PowerShell · Shell Scripting

Networking & Security: TCP/IP · DNS · DHCP · VPN configuration · Access Control · Endpoint Management

Backend & APIs: Node.js · Python · REST APIs · PostgreSQL · MySQL · MongoDB · Supabase · Firebase

Frontend (supporting capability): React · Next.js · TypeScript · TailwindCSS · Vue.js

EDUCATION

Systems Engineering (in progress) · UTN – National Technology University, Argentina 2025 – present

Web Design & Programming · Da Vinci Multimedia Art School, Argentina 2024 – 2026

Industrial Engineering · University of Palermo, Argentina 2022 – 2024

LANGUAGES

Portuguese (Native) · Spanish (Native) · English (Conversation) · Italian (Conversational)
